Specialty APIs and fine chemicals

About ChemCon

ChemCon is a contract development and manufacturing (CDMO) partner producing generic APIs and NCEs for various applications. Our focus is fully cGMP-compliant small-to-medium-scale production. This list provides selected examples of compounds, for which manufacturing is already established or under development at ChemCon. For each substance listed here, proposals and release protocols can be customized exactly to your needs. Please note that regional exclusivities may be in place for certain products. As a contract lab, we are also always prepared to produce substances that are not part of our portfolio, yet. This is of particular relevance for APIs or specialty chemicals that are otherwise difficult to source in the desired cGMP quality and quantity.

+ *cGMP products*

ChemCon's APIs are released to current monographs or to defined specifications following validated internal methods. Please let us know which release specifications you require, and we will adjust our protocol accordingly.

Organic compounds:

- Acetylcholine chloride
- Anagrelide
- Alosetron
- Copper MIBI, precursor for Technetium sestamibi
- Curcumin
- Fenoldopam
- Histamine
- Ibandronate
- Ketotifen
- L-Dopa ethyl ester
- Malathion
- Melphalan free base
- Melphalan hydrochloride
- Methylene blue
- Nicardipine
- Sodium tetradecylsulfate (STDS)

Inorganic compounds:

- Arsenic trioxide
- Chromic (III) chloride hexahydrate
- Copper (II) chloride dihydrate
- Gallium complexes and salts
- Iron (III) chloride hexahydrate
- Manganese (II) chloride tetrahydrate
- Metaarsenite sodium
- Molybdate (VI) sodium dihydrate
- Nitroprusside sodium
- Selenite sodium, anhydrous
- Tetrabromoaurate potassium
- Zinc chloride, anhydrous

Polymers:

- Polyethyleneglycol derivatives
- Polyethyleneimine derivatives
- Hyaluronic acid derivatives

+ *Fine chemicals*

- Biotin-6-amidoquinolin
- Dipyrindamole, impurities
- Folic acid, impurities
- Hemicholinium-3
- tert-Butyl bicyclo[2.2.2]phosphorothionate (TBPS)
- Triprolidine aldehyde hydrochloride

Your product is not on the list? Please contact our CDMO team for custom manufacturing!

Prices and availability are subject to requested volumes and requirements. All inquiries are subject to confirmation and any order subject to our terms and conditions of sale. Patented products available for research and development use, as permitted under CFR 35 section 271(e)(1) or directive 2001/82/EC and directive 2001/83/EC (amendment 2004/27/EC) of the European Parliament. Patented products will not be shipped to countries with active patents thereof.
